95 EXPRESS ENTRANCE POINT RELOCATED, PLASTIC POLE INSTALLATION TO BEGIN ON APRIL 9

Beginning on Sunday, April 9, workers for the I-395/SR 836/I-95 Design-Build Project will relocate the northbound 95 Express Lanes poles to their original location, approximately one mile south of the current entrance as shown above.

The roadway lane striping and overhead signage have already been modified to reflect the permanent location of the 95 Express entrance point. Overhead and trailer-mounted message boards are also being used to alert drivers of the new entrance. Drivers should not cross the double white lines.

Continue reading on the next page...

The installation of the poles is expected to be completed in one to two nights. To complete the pole installation, the following closures will be implemented:

- **Sunday, April 9 (Monday, April 10 if needed)** - All northbound 95 Express lanes will be closed from I-195/SR 112 to the Golden Glades Interchange between 9 p.m. and 5:30 a.m.
- **Sunday, April 9 (Monday, April 10 if needed)** - One northbound general purpose lane from north of I-195/SR 112 to south of NW 29 Street will be closed between 9 p.m. and 5:30 a.m.

Installation of the poles for the southbound 95 Express Lanes exit was completed on Monday, April 3. The 95 Express entrance and exit points had been temporarily relocated due to concrete re-pavement activities in the area, which have now been completed. The work is part of the I-395/SR 836/I-95 Design-Build Project that will reconstruct the I-395 corridor from the SR 836/I-395/I-95 (Midtown) Interchange to the MacArthur Causeway Bridge.

ABOUT THE PROJECT

The I-395/SR 836/I-95 Design-Build Project will add capacity, enhance the flow of traffic and safety and improve access along I-395, SR 836 and I-95.
